

COVID-19 Recommended Supplies for Schools

Prescreening Materials

- COVID-19 Laboratory Process Acknowledgement.
- COVID-19 Participant Questionnaire
- Thermometers (forehead/strip or digital thermometers with a disposable sleeve)

Personal Protective Equipment

- Disposable gloves (Nitrile)
- Safety glasses ANSI Z.87. Sharing of safety glasses is no longer permitted
- Approved CDC masks. N95 Respirators are not necessary at this time (4/21/2020)

Lab Environment Cleaning and Sanitizing Materials

- Liquid hand soap
- Commercial detergent for floors, furniture, bench tops, etc.
- Running water
- Paper towels
- Tissues
- If soap, water, and paper towels are not readily available, provide alcohol-based hand rubs (ABHR) for use if hands are not visibly dirty. Only ABHRs with 60% alcohol or more are recommended in relationship to COVID-19
- Disinfecting wipes
- Registered disinfectants suggested by:
 - United States Environmental Protection Agency (EPA) information (EPA, 2020)
 - American Chemistry Council: Novel Coronavirus (COVID-19)—Fighting Products (American Chemistry Council, 2020)

Training on usage of PPE and Cleaning/Sanitizing Techniques

- Teaching materials
- Training videos
- CDC handouts and posters
